CONTENTS

Increased high affinity beta-adrenergic receptor densities and cyclic AMP responses of CD8 cells in multiple sclerosis
J.W. Karaszewski, A.T. Reder, B. Anlar and B.G.W. Arnason (USA) 1
Immunoglobulin gamma constant gene region polymorphisms in multiple sclerosis
J. Hillert (Sweden) 9
Increased levels of circulating ICAM-1 in serum and cerebrospinal fluid of patients with active multiple sclerosis. Correlation with TNF-α and blood–brain barrier damage
M.K. Sharief, M.A. Noori, M. Ciardi, A. Cirelli and E.J. Thompson (UK, Italy) 15
Cytokine-regulated adhesion between encephalitogenic T lymphocytes and cerebrovascular endothelial cells
R.M. McCarron, L. Wang, M.K. Racke, D.E. McFarlin and M. Spatz (USA) 23
Induction of toxoplasmostasis in a human glioblastoma by interferon γ
W. Däubener, K. Pilz, S. Seghrouchni Zennati, T. Bilzer, H.-G. Fischer and U. Hadding (Germany) 31
Treatment of PL/J mice with the superantigen, staphylococcal enterotoxin B, prevents development of experimental allergic encephalomyelitis
J.M. Soos, J. Schiffenbauer and H.M. Johnson (USA) 39
Induction of class I major histocompatibility complex antigens on adult primate retinal neurons
M.B. O'Malley and P.R. MacLeish (USA) 45
Modulation of the respiratory burst in human neutrophils by isoproterenol and dibutyryl cyclic AMP
K.L. Gibson-Berry, J.C. Whitin and H.J. Cohen (USA) 59
Interleukin-3 and encephalitogenic activity of SJL/J myelin basic protein-specific T cell lines
M.-L. Zhao, J.-Q. Xia and R.B. Fritz (USA) 69
Antibodies to sulfatide and to chondroitin sulfate C in patients with chronic sensory neuropathy
R. Nemni, R. Fazio, A. Quattrini, I. Lorenzetti, D. Mamoli and N. Canal (Italy) 79
Increased synthetic peptide specificity of tissue-CSF bound anti-MBP in multiple sclerosis
K.G. Warren and I. Catz (Canada) 87
Neonatal pinealectomy impairs murine antibody-dependent cellular cytotoxicity
M. Vermeulen, M. Palermo and M. Giordano (Argentina) 97
Effects of ganglioside administration on experimental autoimmune neuritis induced by peripheral nerve myelin or P_2-specific T cell lines
J. Zielasek, S. Jung, B. Schmidt, G. Ritter, H.-P. Hartung and K. Toyka (Germany, Italy) 103
V_H gene family utilization of anti-acetylcholine receptor antibodies in experimental autoimmune myasthenia gravis
Y.M.F. Graus, J.J.G.M. Verschuuren, N.A. Bos, P.J.C. Van Breda Vriesman and M.H. De Baets (Netherlands) 113
Monoclonal antibodies against neuroblastoma. Production and preliminary characterization of their specificity
A. Voigt, R. Häfer and F. Zintl (Germany) 125
Antigen presentation and T cell specificity repertoire in determining responsiveness to an epitope important in experimental autoimmune myasthenia gravis
T.E. Zoda and K.A. Krolick (USA) 131
Susceptibility to demyelinating polyneuropathy in plasma cell dyscrasia may be influenced by amino acid position 9 of the HLA-DRβ chain
M. Vrethem, J. Ernerudh, M. Cruz, O. Olerup, G. Solders, B. Ekstedt, O. Andersen and J. Hillert (Sweden) 139
Antibody-secreting cells to acetylcholine receptor and to presynaptic membrane receptor in seronegative myasthenia gravis
C.-Z. Lu, L. Lu, Z.-S. Hao, D.-g. Xia, J. Qain and B.G.W. Arnason (People's Republic of China, USA) 145
Schwann cells are able to present exogenous mycobacterial hsp70 to antigen-specific T lymphocytes
A.L. Ford, W.J. Britton and P.J. Armati (Australia) 151
Augmentation of adoptively transferred experimental allergic encephalomyelitis by administration of a monoclonal antibody specific for LFA-1α
C.T. Welsh, J.W. Rose, K.E. Hill and J.J. Townsend (USA) 161
Phagocytosis of myelin by astrocytes in explants of adult rabbit cerebral white matter maintained on Gelfoam matrix
S.A. Vinores and M.M. Herman (USA) 169

(Contents continued on p. 230)

0165-5728(199303)43:1/2;1-V

(Contents continued from back cover)

HIV gp120 alteration of DAMA and IL-1α induced chemotaxic responses in human and invertebrate immunocytes
G.B. Stefano, E.M. Smith, P. Cadet and T.K. Hughes Jr. (USA) 177
Divergent responses of human astrocytoma and non-neoplastic astrocytes to tumor necrosis factor alpha involve the 55 kDa tumor necrosis factor receptor
B.P. Barna, G.H. Barnett, B.S. Jacobs and M.L. Estes (USA) 185

Short Communications
T cell receptor Vβ gene utilization in myelin basic protein specific clones from CXJ1 recombinant inbred mice
B. Kalman, R.L. Knobler and F.D. Lublin (USA) 191
Interaction between mast cells and glial cells: an in vitro study
M. Shalit, T. Brenner, E. Shohami and F. Levi-Schaffer (Israel) 195

Abstracts of the satellite conference of the International Congress of Immunology 201
